

# FREE VIRTUAL TUTORING WEBINAR

March 23rd, 2017 • 2:00-2:45 PM

Have you heard about FLC's [new virtual tutoring platform](#), which allows tutors/teachers and students to connect and conduct live online lessons from anywhere with internet access? This project is convenient for “snowbird” volunteers or others who would like an alternative way to offer lessons and even allows instructors to record and share the sessions with their students.

During this training session, we will show you how to use this **free** tool. Virtual tutoring uses audio, visuals, electronic whiteboard and video conferencing technology to provide tutors and students with the ability of having tutoring or small group sessions anywhere they have internet access. Instructors can easily schedule a live session and give the link to their student.

If you would like to take part in this live demo please join us by registering below!
